limited

# International Student Exchange Programme (ISEP)

## Introduction

The purpose of International Wool Textile Organisation (IWTO) is to position and to value wool clearly in the consumer's mind as a material, which is desirable for its technical, ethical and comfortable values. To realise that, IWTO wants to promote and support education in the textile sector as well as increase awareness of the unique properties of wool and wool blend products around the world by targeting selected textiles/ technical textiles/fashion/apparel/design universities, academies and schools and commercial companies. The project is funded by Australian Wool Innovation Limited (AWI).

## Project

The International Student Exchange Programme is offered to students and employees from around the world. This project is aimed at strengthening links between wool industry and education institutions by enabling young talented people to undertake industrial and academic placements in companies or organisations active in the wool sector, especially dealing with Australian wool. 10 candidates are involved in the programme in 2005. Successful applicants are offered a 3-6 months traineeship in one of the companies or organisations that are active across the wool pipeline from sheep to shop. The location of the traineeship is relevant to the participants' educational profile and preference.

## Applicants

The programme is open to students from textile and fashion universities / schools and to employees currently working in the textile industry

## Conditions

Applicants should have excellent motivation, be open-minded, curious and passionate about wool textiles.
